## JSfirm.com has a secret...

---

Roanoke, Texas (July 23, 2020) - What's our secret? That job seekers can find every aviation company in their backyard! JSfirm.com is offering job seekers the tools and training on the best ways to find a job in the aviation industry, even during the toughest of times.

JSfirm.com is committed to helping every aviation job seeker find their ideal job. Our new mapping feature shows all companies by geographical location, and allows job seekers to download a list of companies they are interested in working for directly to their devices to help them easily manage their job search.

The most popular facet of the JSfirm.com company mapping feature is the ability for job seekers to send their resume and a brief message to a company they are interested in - even if a company is not actively advertising an open position on JSfirm.com.

Abbey Hutter, Executive Director of JSfirm.com said, "We believe that every company is open to hiring the right candidate - even if that company doesn't have a job opportunity posted right now." She continued, "If a great candidate presents themselves to a company, a smart hiring manager will find a spot for them."

JSfirm.com believes that giving job seekers the tools to look beyond the companies that are currently posting open positions gives them a huge advantage to broaden their job search and increase their likelihood of landing a great job, which is more important now than ever.
